

## The Sustainable Neighbourhood Programme - Oratia

---

*Free assistance with weed control, native re-planting and connecting with your neighbours*

---

Focused in the vicinity of the Oratia Church - we work to eliminate weeds and re-introduce native plants within your property, along streams, public reserves as well as the road corridor. The aim is to bring back native wildlife by providing a healthy and safe habitat to connect areas along the North-West Wildlink. Not only do we focus on improving the local environment, but also to strengthen connections between neighbours, and creating a sense of belonging and wellbeing.

### **If you are keen to be involved...**

We can provide :

- Free advice on weed and animal pest control
- Weed bags, ginger barrels, access to large weed bins and herbicides
- Free native plants for public and private land
- Access to contractor assistance for removal of large pest species (ie monkey apple or wattle), or weeding/planting on steep, un-accessible sites.
- Support to help make your neighbourhood, healthy, safe and better connected.
