

...Further information

The Sustainable Neighbourhoods Programme is supported by Auckland Council and environmental organisations, including Gecko Trust. This is a community led initiative which provides advice and practical assistance for ecological restoration projects as well as helping to build safer, more resilient communities.

There are already approximately 550 households participating in 57 Sustainable Neighbourhoods in West Auckland so it would be great if you could join us.

~ Kahili Ginger! Weed control is more effective if we work together as a neighbourhood.

Gecko is an organisation that brings people and nature together to build ecological and community wellbeing so multiple, long term benefits happen - for both us and nature.
