

## INTRODUCTION.

---

**I**N presenting our Catalogue for 1888-89 to our friends and customers, we have much pleasure in thanking them for their liberal support and kind recommendations for past seasons, and assure them that all orders entrusted to us, will receive every care and attention.

We take great care to send out all plants correctly named, and to do this, we fruit all plants as soon as possible, and work all our young stock from them, and not from nursery stock, as is often done.

Our collection of Apples contains over 600 different varieties, all worked on blight-proof stocks, above the surface of the ground, thus ensuring the roots perfectly free from blight.

Our stock of all kinds of Fruit Trees this season is more extensive and superior in quality to any we have previously offered, well rooted, and in the best condition to bear removal, an inspection of which is cordially invited.

Trains three times a day to Waikomiti Station, one and a-half miles from the Nurseries.

# E. J. PARR & SONS'

## CATALOGUE OF FRUIT TREES.

### APPLES.
